PRIMOZONE ENVIRONMENTAL POLICY

As a company we are dedicated to solving water treatment issues in an environmentally friendly way, we are also committed to reduce the environmental impact of our operations and aim to minimize the carbon footprint and waste streams of the company as well as of our customers.

This is done by

- Develop and designing products that reduce the energy consumption and improves the environmental impact of our customers
- Maximizing energy efficiency and reducing waste streams internally and throughout the entire value chain
- Meeting all applicable environmental and other laws and regulations
- Minimizing the carbon footprint and the use of hazardous substances in our operations
